SUMMARY

Enterprise-Context Systems Engineer specializing in the architecture, deployment, and automation of complex, multi-disciplinary technical solutions. Proven ability to operate as a full-lifecycle technical leader—from requirements scoping and development to infrastructure modernization, DevOps integration. Expert in bridging the gap between high-level business needs and technical implementation across diverse environments (**AWS, Azure, Linux, Hybrid Networking**) Experienced with clientele adherent to strict regulatory guidelines (**HIPAA, CMMC 2.0**).

EXPERIENCE

Integrations Developer/Project Lead

since Jan 2025

Propela Tech

Cleveland, OH

- **Architected and implemented a core legal workflow management solution** integrating three disparate systems, processing **over 3,000 cases** since deployment.
- **Drove process automation** that converted **tens of minutes of manual data entry into seconds** by automating WCAB filing, documentation generation, and signature processes.
- **Modernized DevOps and Security Infrastructure** by implementing AWS secrets migration, partnering on **Docker/ECS deployments**, and ensuring **HIPAA compliance** via encryption standards for RDS data.
- **Led the full technical project lifecycle as the sole architect and developer**, handling requirements gathering, solution architecture, agile ticketing, and client reporting.

Assistant Developer

since Nov. 2023

Digital Graphene

Solon, OH

- Contributed to the development of a **Cloud Native proofreading application** using **Azure Static Web Apps (SWA)** and **Functions Apps**, resulting in a solution that achieved a **32x cost savings** over existing production tooling.
- Assisted in implementing enterprise features, including **Azure B2C integration for user IAM** and Stripe integration for subscription billing metrics.
- Drove development process optimization by transitioning to **React/TypeScript** for superior development velocity and library support.

Applications Engineer/Network Coordination Lead

Jul. 2023 - Jan. 2025

Root Integrated Systems

Independence, OH

- **Served as a Technical Consult and Onboarding Lead** for clients ranging from mid-size businesses to **DoD contractors (CMMC 2.0 compliant)**, requiring system planning for **GCC High Azure** environments.
- **Maintained System Modernization & Integration** efforts by planning **Splunk and Happy-Fox integrations** to enhance cloud observability, including the use of **NodeRED flows** for API data ingestion.
- Drove **process automation and efficiency** by developing custom **Batch/Powershell scripting** for VSI encoder devices, resulting in a **near 10x increase** in configuration speed.
- **Architected and advised** on complex networked AVoIP deployments; defined **VLANs and QoS standards** using **Netgear CLI**.

IT Service Desk Technician (Contract)

May 2023 - Jul. 2023

Flynn Restaurant Group

Independence, OH

- **Managed Tier 1/2 operational support** across six national fast-food brands (>\$3.5B in sales), adhering to **1-hour ITIL-based resolution timelines** for critical incidents impacting revenue.
- Provided advanced systems administration support, including **Hybrid AD/Azure AD permissions management** and troubleshooting complex **ERP (SAP) synchronization issues**.
- Executed **full-stack IT diagnostics**, from Layer 1-3 network troubleshooting (VoIP, Cisco Meraki) to application-layer maintenance via **CMD/Windows CLI**.

Backend Developer Shadow

Jan. 2022 - May 2022

Findaway Voices

Solon, OH

- Gained early exposure to **API security modernization efforts** on a high-traffic distribution platform, focusing on **REST endpoint permission refactoring** and API key authorization.
- Observed enterprise-scale system refactoring via large-scale **Python 2.x to 3.x code migration efforts**, directly supporting improved security and long-term application maintenance.

INFRASTRUCTURE & AUTOMATION PROJECTS

Personal Homelab & IaC | *Ansible, Terraform*

- Designed and maintained a personal infrastructure cluster using **Proxmox** (Linux virtualization) and **pfSense** (routing/firewall), implementing a **multi-VLAN network** via a **Cisco Catalyst** switch configured via CLI.
- Developed an **Infrastructure-as-Code (IaC)** pipeline using **Terraform** to automate the provisioning of LXC containers and **Ansible** to manage application configuration.
- Secured the environment for remote access by deploying a **Tailscale Exit Node** in a containerized LXC environment, establishing a **Zero Trust Network** model.

Encore of Eldoria (Encore Hackathon) | *Encore, Go*

- Discord chatbot written in **Golang** & developed in the **Encore** ecosystem. Processed player commands with the Discord API's Golang wrapper and handled game logic with Encore's API backend.

Codebase | *Rails, React, Redux, Arios*

- Full-stack **React** application supported by a **RESTful Rails API** & Postgres database. Implemented client-side debouncing and database fuzzy string searching, supporting global state management with Redux.

Discord Chat Bot | *Python, pycord, markovify*

- A Hidden Markov chat bot trained on 100k+ server messages, leveraging Discord's API for concurrent user commands, deployed on a local Linux server with runtime managed by **systemd**

TECHNICAL SKILLS

Languages: Python, Ruby, Go, JavaScript, TypeScript, C++, SQL

Frameworks/Libraries: FastAPI, Vite, React, Rails, Sinatra, .NET, MongoDB

Cloud/Infra: **AWS** (ECS, ECR, Lambda, RDS, IAM) **Azure** (SWA, Functions, B2C, AAD), Terraform, Docker, Ansible, Proxmox, Encore

Networking/Security: Tailscale, pfSense, Cisco CLI, Git/Github Actions

Devops/Systems: Splunk, NodeRED, Salesforce, Hybrid AD, Linux, PowerShell/Bash Scripting

Foreign Languages: Chinese (Business Proficiency)

EDUCATION

Tufts University

Bachelor of Arts in Chinese

Medford, MA

Sep. 2017 - August 2021

Flatiron School

Software Engineering Immersive Bootcamp

Remote

Sep. 2021 - Jan 2023
